

zain Ul Abideen

Full-Stack Developer

I am a well organized and diplomatic person who likes to code and develop complex web applications. My expertise are in both front-end and backend with database. I build many sites using front-end technologies. I also build a full stack websites using both front-end and back-end technologies. My aim is to satisfy the client with my work.

PERSONAL PROJECTS

Personal Portfolio (05/2020 - 07/2020)

- Build a Front-end website using to show-case my personality and my work

Full-Stack Web Application (06/2021 - Present)

- Working on a Full-Stack web application. Website is able to connect with backend which is coded in flask(python) and database which is coded in MySQL.
- The purpose of this website is to help mankind. Muslims are in different countries. One of the most important problem of Muslims is to eat Halal food and avoid Haram (Forbidden in Islam) food. This site is able to tell the user which E-Code(a specific number given my UK and other governments) is Halal or Haram.

CERTIFICATES
